Hi

Try

Assuming data is in column A

=MID(A1,FIND(" ",A1)+1,255)

Copy down as far as required.

Copy block of results and Paste Special>Values to "fix" as opposed to leaving as formulae

[news:61698ffe1b1de@xxxxxx](mailto:news:61698ffe1b1de@xxxxxx)

I have values in a column where the cell values are like the following.

I

would like to delete the first few characters until a G is reached.

For e.g.

I would like :

PRJ GB2-E0001

WBS GB2-E0001

to be converted to:

GB2-E0001

GB2-E0001

I would be grateful if you could provide me the code to do just this.

Many Thanks,
