Thanks, Dave! It works.... I find that with this code all I have to do is click on the field and the other fields get deleted. Is there anyway to have the delete occur only if I change the data within the drop-down list field?

Thanks again,

Kevin

You only get one of these worksheet_selectionchange events per worksheet.

But you can combined the code into one subroutine:

```
Option Explicit
Private Sub Worksheet_SelectionChange(ByVal Target As Range)
Application.EnableEvents = False
On Error GoTo sub_exit
If Not Intersect(Target, me.Range("D6:G549")) Is Nothing Then
With Target
If .Value = "a" Then
.Value = ""
Else
.Value = "a"
.Font.Name = "Marlett"
End If
End With
End If

If Not Intersect(Target, Me.Range("C1")) Is Nothing Then
Me.Range("C2,c3,c4").Value = ""
End If

sub_exit:
Application.EnableEvents = True
End Sub
```

I realize this is an old post, but I am having the same problem and am not sure how to handle it. I keep getting an error message that states "ambiguous name detected". I'm a complete newbie to this whole thing, so please advise. Here's the code:

```
Private Sub Worksheet_SelectionChange(ByVal Target As Range)
Application.EnableEvents = False
On Error GoTo sub_exit
If Not Intersect(Target, Range("D6:G549")) Is Nothing Then
With Target
If .Value = "a" Then
.Value = ""
Else
.Value = "a"
.Font.Name = "Marlett"
End If
End With
End If
sub_exit:
Application.EnableEvents = True
End Sub
```

```
Private Sub Worksheet_SelectionChange(ByVal Target As Range)
If Target.Address = "$C$1" Then
Range("C2,C3,C4").Value = ""
End If
End Sub
```

What variable is it that I am being asked to change?

Thanks,

Kevin

"Stefi" wrote:

That was only a frame, the real code is like this:

```
IF Target.Address = "$E$3" Then
Range("F3").Value = ""
End If
```

Regards,
Stefi

Re: Help!!!

~frendabrenda!~ ezt ~rta:

I tried
IF Target.address = \$\$3 then
Clear \$\$3

I got an error for the \$ as an invalid
character

I also got an error for Clear as a function not
defined

I am using excel 2003...does that make a
difference?

Thanks again for the help!

"Stefi" wrote:

Use worksheet change, but
put an IF at the beginning of
the sub:

```
IF Target.Address =  
vendor-cell then 'use  
absolute reference, e.g.  
$$1  
clear part-number-cell  
END IF
```

Regards,
Stefi

Good
morning.

I have an in
cell drop
down list of
vendors that
another in
cell drop
down
list of part

Re: Help!!!

numbers
relates to. I
have it set
so that only
part
numbers
that belong
with a
chosen
vendor
appear. The
problem
that I have
is that if
you have
already
picked a
vendor and
part
number,
then change
the vendor,
the
old part
number
(which does
not belong
to the new
vendor) still
remains. Is
there a way
to clear the
part number
cell on any
change to
the vendor
cell?
(Not on
worksheet
change as
other
changes
should be
allowed
without
removing
the part
number.)
Thanks for
your help!
brenda
