Look for cells that contain that same error.

Or if you're adding cells:

=a1+a2+a3+...

Look for some non-numeric data in any of those cells.

Neo wrote:

I have a sheet in MS Excel 97.

When I sum the columns, for some of them I get
invalid value #ARG!.

I can't answer the question right now, but for those interested, #ARG! is
the Polish version of #VALUE!.

I use the Polish version and it gives me #ARG!.
