I think it would be better to introduce new columns N and O – cost * qty out and sale price * qty out, then make the subtotal formulae point to these ranges instead of J, K etc.

Hope this helps.

Pete

Thank you pete but when qty out is more than 1 Cost Price will be multiplied by qty out and Sale Price will be multiplied by qty out. so how i should use the formula in b2, c3 etc.

Regards.

"Pete_UK" wrote:

I think the "Formula" you want in B3 is:

=SUBTOTAL(9,J7:J10)

adjust the range to suit, then copy into C3:E3.

Hope this helps.

Pete

A B C D I J

K L M

6	Date	PrdoctID	QtyOut	QtyNow	Descpn	Retail	Cost
						Cmsn	GainLoss
7	26.11.07	200700105	2	8	Stonefgr	1300.00	500.00
						01600.00	
8	26.11.07	200700106	11	0	Stonefgr	3000.00	600.00
						26400.00	
9	26.11.07	200700068	2	22	Textiles	600.00	320.00
						00560.00	
10	26.11.07	200700249	1	0	Paintings	21000.00	7000.00
						14000.00	

Sir, just same format of my worksheet. I need a formula in
B3, C3, E3 and ...

I want to see what is the exact Gprofit on particular date after
data>Filter
of Date Column

I hope I now cleared to you all thing and you will better
understand.

Regards
