Click on the office button (the Orb in the top left corner)  
click on the Excel Options button  
Click on the Customize option on the left hand side

You can modify the Quick Access Toolbar (QAT) here.

There's a Comma Style under All Commands.

John Nettles wrote:

I appreciate you responding but while know and understand that control 1 is a mini-shortcut to the format cells overall box, I am looking for the icon that is one step, i.e. like the "comma" symbol on the little icon/toolbar command that makes the numer in the cell a "1,2345.67" format versus a 12345.67" format a 1-step process. The older version of Excel had the icon/toolbar command for giving a user-defined default cell pattern background but I can not find it on the 2007 version. Thanks again.

You can modify the ribbon in Excel 2007 with VBA. The icons are in Winows/sytem32 somewhere, I have forgotten where. Others know.

Thanks for responding but maybe I didn't make myself clear enough. I understand how to get the cell shaded with a pattern, I would like to know what the icon is called or look like. For instance the "open an exisiting file" icon is the pic of the file folder opened with a little

arrow above  
it.

I am looking for the "1 click" icon for doing the pattern shading (cell has background of shaded dots). Thanks again, John

Home/Font section,select the dialog launcher. Or simply Ctrl+1. This brings up Format Cells. Select the fill tab and go from there.

I do a lot of shading (Home  
> Font > Fill > Pattern  
Style) and I can not  
determine what icon it is in  
this new version. Any help  
would be  
appreciated? Also, is there a  
list of icons that can be  
determined by  
entering where it is located,  
i.e. see above for shading?  
Thanks!!
