Thank you!

So easy!

I suppose you opened two extra windows for the workbook (Window>New window) and now you see the same file in three windows. Just close two of them and save the file in a one-window state!

Hi,

Something strange happend for the first time. I think it's easy to fix but I can't find out howe, please help.

I was experimenting with one of my large files, locking at different views, then I saved. Now I get 3 versions of the same file everytime I oppen it. Do anyone know how to get rid of this?
