hi, sorry am at least little bit novice, guesse I insert my macro(?)
inbetween this somewhere? (dim means dimension? do I have to define that,
or is that for my button specified cell.. = "X" ?) thanks.

hi
you can't put a sub within a sub as least not like you are trying to do.

You can sort of.

```
Sub Caller()  
Dim x  
x = Int(Rnd() * 100) + 1  
If x > 50 Then GoSub SubInASub  
x = 3  
Exit Sub  
SubInASub:  
MsgBox "SubInASub called"  
End Sub
```

Not sure if this addresses the OP's problem; not saying you should do it;
not saying you shouldn't do it; just saying that you can.
