I am a newbie when it comes to Excel and after doing some searching through threads I couldn't find the exact answer I needed so here goes:

[image: <http://www.geocities.com/danmann81/timesheet.jpg>]

The red box is the area I'm trying to format. What I want to do is set the formula for dates so that the dates update automatically without having to change them manually every pay period. I hope that make sense.

Thank You

Daniel
