Hi

This should do it, just change the "off" value to place the text in the desired rows:

```
Sub CommandButton1_Click()
```

```
  Ir = Cells(Rows.Count, "c").End(xlUp).Row
```

```
  For Each c In Range("C1:C" & Ir)
```

```
    If c.Value <> "" Then
```

```
      Sheets("Sheet2").Columns("E:F").ClearContents
```

```
      For l = 1 To c.Offset(0, 2).Value
```

```
        c.Resize(1, 2).Copy Sheets("Sheet2").Range("E3").Offset(l + off,
```

```
0)
```

```
      off = off + 3
```

```
    Next
```

```
  Sheets("sheet2").PrintOut
```

```
  off = 0
```

```
  End If
```

```
Next c
```

```
End Sub
```

Sorry, I didn't read your first post carefully enough:–)

C.Resize(1,3).Copy

Re: Labels

```
Sub  
  CommandButton1_Click()  
  lr=cells(rows.count,"c").end(xlup).row  
  for each c in range("C1:C"  
    & lr)  
    If C.Value <> "" Then  
      c.Copy  
      Sheets("Sheet2").range("E3")  
      sheets("sheet2").PrintOut  
    End If  
  Next C  
End sub
```

Can anybody help me with
this?

ok, it works. Thank's. But what with number of copies– how
can i
specify it in connection with value in each record so it will
be equal
to amount of item pallets?

ok, thank's. One more question– how to print 4 labels on 1 sheet in a
horizontal position?

Hi, actually i have a changed formula because in your version it
copied formulas from cells– not the values. Now it's sth like that:

```
Private Sub CommandButton1_Click()  
  
  Application.ScreenUpdating = False  
  
  lr = Cells(Rows.Count, "c").End(xlUp).Row  
  For Each c In Range("E1:E" & lr)  
    If c.Value <> "" Then  
      c.Resize(1, 2).Copy  
      Sheets("Arkusz2").Range("E3") _  
      .PasteSpecial Paste:=xlValues, _  
      Operation:=xlNone, SkipBlanks:= _  
      False, Transpose:=False  
  
      For x = 1 To c.Offset(0, 2).Value
```

Re: Labels

Re: Labels

```
Sheets("Arkusz2").PrintOut  
Next x
```

```
End If
```

```
Next c
```

```
Application.ScreenUpdating = True  
End Sub
```

I think that your last proposition should be added in 'For x.....'
loop. Am I right?

.
