Here is what I've been able to workout so far but can't find out where to insert the change directory command I have set up a folder called 'New Files' on my 'C' drive, this is were I would like to save them at.

```
Private Sub CommandButton1_Click()  
Dim FName1, FName2, Fullname  
FName1 = "CK0"  
FName2 = Range("AU2").Value & " "  
FName3 = Range("J4").Value  
Fullname = FName1 & FName2 & FName3  
Application.DisplayAlerts = False  
ActiveWorkbook.SaveAs Fullname, FileFormat _  
:=xlNormal, CreateBackup:=False  
MsgBox "Saved to " & CurDir  
End Sub
```
