Doing PrintScreen with code...

```
Private Declare Sub keybd_event Lib "user32" (ByVal bVk As Byte, ByVal _  
    bScan As Byte, ByVal dwFlags As Long, ByVal dwExtraInfo As Long)
```

```
Private Const KEYEVENTF_KEYUP = &H2
```

```
Private Const VK_SNAPSHOT = &H2C
```

```
Private Const VK_MENU = &H12
```

```
Sub AltPrintScreen()
```

```
    keybd_event VK_MENU, 0, 0, 0
```

```
    keybd_event VK_SNAPSHOT, 0, 0, 0
```

```
    keybd_event VK_SNAPSHOT, 0, KEYEVENTF_KEYUP, 0
```

```
    keybd_event VK_MENU, 0, KEYEVENTF_KEYUP, 0
```

```
End Sub
```

Saving it from the clipboard is an entirely different matter  
good luck :)
