Hi,

I don't have code, but just a few details about MsgBox (see online help):

You have other buttons available in msgbox:

-vbOKOnly 0 Display OK button only.

-vbOKCancel 1 Display OK and Cancel buttons.

-vbAbortRetryIgnore 2 Display Abort, Retry, and Ignore buttons.

-vbYesNoCancel 3 Display Yes, No, and Cancel buttons.

-vbYesNo 4 Display Yes and No buttons.

-vbRetryCancel

So if want to display Abort,Retry,Ignore buttons with a Warning icon:

MsgBox "did Not Work!", vbAbortRetryIgnore + vbCritical, "TEST"

as you can see , you just have to add the vbMsgBoxStyle in the Buttons

parameter as in : vbAbortRetryIgnore + vbCritical

Would that be enough flexibility in your case?

But maybe you already know about that and it doesn't fit your needs.

Regards,

Sebastien
