Gareth,

Yes it does. The following works...

'-----

```
Sub Test()  
Dim rngA As Excel.Range  
Dim lngN As Long  
  
Set rngA = Range("T5,C7:T9,T13,C15:T17,T19,C21:T23")  
  
For lngN = 1 To rngA.Areas.Count  
Range("A4")(1, lngN).Value = rngA.Areas(lngN)(1).Value  
Next  
Set rngA = Nothing  
End Sub
```

'-----
