Hi all

I am currently building an Excel sheet by using VBA. I want to add some messages when a user has not entered some values. Those messages must only appear when a user changes a value of a specific cell. To make that happen I use the code below. This code works fine when a user enters a value to the specific cell, but when a user uses the Goalseek function to change the value the message will not appear.

Can anybody please help me out.

Best regards,

Chris

```
Private Sub Worksheet_Change(ByVal Target As Range)
If Target.Address = "$N$5" Then
```

.
