I would.

This is a plain text (no attachments and no HTML/RTF posts) newsgroup.

Gary Keramidas wrote:

when i create a post, it's html, when i reply to a post, it's in the original format. and sometimes i'm in vista, i probably have it configured differently.

since i don't use it too much, i haven't taken the time to adjust all of the options.

want me to change it?

Yes.

And why do you sometimes post in HTML/RTF format?

Re: subtotal question

This is new for you.

Gary Keramidas wrote:

what version of excel introduced the subtotal
function numbers 101–111?

was
it
2003?
