Thanks, but how do I get it to repeat through each row that has a value in the column?

"Castell" wrote:

You could also use `ActiveCell.Offset(1,0).Select` in place of each of the `Range("99").Select` commands.

I'm trying to write a macro to select a cell, move to the end of the cell, press enter, and move to the next cell in that row & then repeat for all rows in that column. Here's what I have so far.

```
Range("A2").Select
ActiveCell.FormulaR1C1 = "07-30365"
Range("A3").Select
ActiveCell.FormulaR1C1 = "07-40281"
Range("A4").Select
ActiveCell.FormulaR1C1 = "1272-00-02"
Range("A5").Select
ActiveCell.FormulaR1C1 = "1272-00-03"
Range("A6").Select
ActiveCell.FormulaR1C1 = "1272-00-04"
Range("A7").Select
ActiveCell.FormulaR1C1 = "1272-00-05"
Range("A8").Select
End Sub
```
