Hi

AFAIK this is not possible with formats. One workaround:

Use a helper column with a formula like

=LEFT(A1,3) & "-" & MID(A1,4,200)

>-----*Original Message*-----

>*I'm trying to make a 3 letter, 4 number code such as*

PMP3010 to automatically add a dash between the number and

the letters. For example. I would like PMP3010 turn into

PMP-3010.
