James, text wrap got the other code, copy and paste this one

```
Sub test()
Application.ScreenUpdating = False
ActiveSheet.Unprotect password:="" ' if you have a password put it between
'the "" , like this "mypassword"
Dim i As Integer, p As Picture, r As Range, c As Range, ii As Integer
ii = 1
Set r = ActiveSheet.Range("G5:G14")
ActiveSheet.DrawingObjects.Delete
For Each c In r
ii = ii + 1
If c <> "" Then
With Application.FileSearch
.NewSearch
.LookIn = "c:\drugpics"
.SearchSubFolders = False
.FileName = "*" & c & ".jpg"
.Execute
For i = 1 To .FoundFiles.Count
With ActiveSheet
Set p = .Pictures.Insert(Application.FileSearch.FoundFiles(i))
.DrawingObjects(p.Name).Left = .Columns(ii).Left
.DrawingObjects(p.Name).Top = .Rows(16).Top
.DrawingObjects(p.Name).Width = .Columns(ii + 1).Left - .Columns(ii).Left
.DrawingObjects(p.Name).Height = .Rows(17).Top - .Rows(16).Top
.DrawingObjects(p.Name).Placement = xlMoveAndSize
.DrawingObjects(p.Name).PrintObject = True
End With
Exit For
Next i
End With
End If
Next c
ActiveSheet.Protect password:="" ' if you have a password put it between
```

Re: How can I add protect/unprotect sheet to this code?

microsoft.public.excel.worksheet.functions: Re: How can I add protect/unprotect sheet to this code?

```
'the "" , like this "mypassword"  
Application.ScreenUpdating = True  
End Sub
```

```
