Toto ha scritto:

I need a formula to find how many productA(f.ex. apples) have I sold at the same time as i have sold productB (f.ex bananas) (with identical invoicenumber), f.ex.:

invoiceno. product kg

50 apples 1,00

50 bananas 2,00

51 apples 1,00

52 apples 1,00

53 apples 1,00

53 bananas 2,00

54 bananas 2,00

55 apples 1,00

55 bananas 2,00

You can use Autofilter, filtering on the column with invoice number

Hope I helped you.

Thanks in advance for your feedback.

Ciao
