The ALT + F11 VB suggestion fixed the problem. Thanks. Thanks very, very much.

Martin.

Gord Dibben wrote:

It should be on your right-click menu.

If not, perhaps you need to reset that menu.

Hit ALT + F11 to go to the VBE editor.

Then View>Immediate Window.

Copy/paste this line into the window and hit <enter>

```
Application.CommandBars("Cell").Enabled = True
```

OR copy/paste this sub to a module and run it.

```
Sub reset()  
Application.CommandBars("Cell").Enabled = True  
End Sub
```

Also, In Tools>Customize>Commands>Edit is a Paste Special Icon that can be moved to a Toolbar.

I use the Special Paste options frequently. Is there a simple way to open that dialogue box? Such as a hotkey combination or a way to add it to the right-click (mouse) menu? It is a pain to always have to mouse click "Edit" then "Special Paste..."

Thanks,
