Hi

How do you calculate that?

I just loaded Sage Payroll, and for 07 Jun 2007 it gives Tax week 9. As Sage is probably the widest used payroll package in the UK, I don't think they will have got it wrong<g>
Tax week 10 commences on 08 Jun 2007

Roger Govier wrote:

With your formula, you get negative week numbers once you get past December of the year, gradually reducing from -65 to -52.

I think the formula is nothing more complicated than
`=INT((A1-DATE(2007,4,6))/7)+1`

Rick Rothstein wrote:

`=INT((DATE(YEAR(A1),MONTH(A1)-1,DAY(A1))-DATE(YEAR(A1)
+ (32 *
MONTH(A1) + DAY(A1) < 134), 3, 6))/7)+1`

For today's date (7 June 2007) both of the above formulas give the answer 9.

Re: Week Numbers for Tax Year

However, I calculate that this week is at least UK Tax Year Week No. 10, or possibly 11.
