Yes that sounds like it. I need to protect the email transmissions from sniffers in other countries.

I will review the link this evening but in general terms, is this something that I can setup or is this incredibly complicated?

> Hello,

>

> *It's possible to create secure email for Exchange. I'm not sure if you're referring to using secure mail when accessing your mail remotely via a browser (using HTTPS), but if you're looking at ways to encrype all the email using outlook, you may want to take a look at KMS (Key Management Server):*
