The allow is grayed (inherited) there are no grayed deny boxes! There are no checked denies!

>-----Original Message-----

>You may have Allow checked, but do you also have Deny checked? If so, for

>which items? Also, is the Allow and Deny both Gray checkboxes (indicating

>Inherited perms) or are they White checkboxes

(indicating Explicitly set at

>the object level)? It matters. If both are inherited,

the Deny will

>*always* win. If the Allow is explicit (at that level), it will overridden

>the Deny.
