Hi Ben

Good thinking but the IWAM\_SERVERNAME account is not locked.  
So I followed the instructions as laid out in the help article:

But When I ran the `s>cscript synciwam.vbs -v` it generated the following text and also the error!

```
" C:\inetpub\AdminScripts>cscript synciwam.vbs -v
Microsoft (R) Windows Script Host Version 5.6
Copyright (C) Microsoft Corporation 1996-2001. All rights reserved.
```

IIS Applications Defined:

```
Name, AppIsolated, Package ID
w3svc, 0, {3D14228C-FBE1-11d0-995D-00C04FD919C1}
Root, 2,
IISHelp, 2,
IISAdmin, 2,
IISSamples, 2,
MSADC, 2,
bin, 2,
OMA, 2,
ROOT, 2,
IISAdmin, 2,
IISHelp, 2,
```

Out of process applications defined:

```
Count: 1
{3D14228D-FBE1-11d0-995D-00C04FD919C1}
```

Updating Applications:

```
Name: IIS Out-Of-Process Pooled Applications Key:
{3D14228D-FBE1-11D0-995D-00C04
FD919C1}
Error: 80110414:"
```

Anyway I re-enabled forms again, restarted IIS Admin but I still got the same message as before with exact error messages!

Have you anymore ideas on this?

Thanks
