Matt,

Can you delete the email from the queue?

Kind Regards,

Hello,

I have a situation, hoping some one can help.

My exchange user sent out one group email to their GAL, now that email is somehow being sent at the rate of 100 emails every hour. I have tried deleting user mailbox, but email is still being received from that users email. Can someone help me stop this madness. My antivirus show no viruses of worms. Brightmail cannot even quarantine the users emails.

Regards,

Matt
