- 

We have exchange 2003 enterprise edition.  
On campus we can send/receive email with outlook 2003.

When off campus, we use OWA. We can receive email and can open and read our email, but when we try to send, it stops the Information Store and does not send.

I have the store.exe to restart automatically no matter what and it does with no problem, but still can not send from OWA.

Any ideas?

Thanks in Advance,  
Carlis Burns  
CIO
