Hi,

I've successfully set up my Exchange 2003 Server Enterprise Edition, running on Windows 2003 Server Standard Edition. But I want to set the global limitation for the mailbox store to 2GB, 3GB and 4GB for warning, receive only and deny. But when I enter a value that is equal or greater than 2GB (2097152 kB), a popup tells me values are limited to 2097151 kB. Can I set these limits above 2GB?

Jeroen
