Did you ever install IMF v1? If yes, uninstall it first. Not sure if it's installed? Check \exchsrvr\bin folder – do you see MSCFV1 folder in it? If yes, you still have IMFv1 installed. If you don't see it in Add/Remove Programs, you will need to reinstall IMFv1, then uninstall it, and apply Exchange Server 2003 SP2 which includes IMF v2.

Also look at this:

<http://www.exchangepedia.com/blog/2005/10/exchange-server-2003-sp2-and-imf.html>

I am running Exchange 2003 SP2. Do I need to be in Native mode to take advantage of this. I don't see an option in my Virtual SMTP servers.
