The closest available thing is the Connection Filtering IP Accept List. If the senders to be whitelisted have their emails coming from the same IPs, then you could whitelist them like that. Otherwise you will need a third party extension.

Since you are having many false positives, did you enable IMF updates? These are very important for IMF to keep up with the latest spam. More details from here:

okay ... so we can not list domains which are defined as safe senders.

However if a user has been added as a safe sender in outlook ... is their a way to ensure the IMF doesnt not mistake their emails and treat that user [who is sending as spam]??

Because, we have many false positives.

Thanks

Hi,

That user was a safe sender. Why does IMF block from that user??

"Alexander Zammit [MVP]" wrote:

This is normal behaviour for Exchange 2003
IMF.

You are using the IMF Gateway Archive
Action. IMF will archive the
email
regardless of your Outlook settings.

The safe-senders are only considered for
emails that are not blocked
by
the
Gateway Action.

Re: IMF and SCL values

Hi,

You can see that
ilimcater@xxxxxxx is a
safe user but IMF v2 still
blocks
[some] emails ...

<http://www.box.net/shared/oj7c8ascgk>

I have seen
on IMF
"Debbie
Davis"
caught
twice by
IMF ... is
there
a
way
I
can add that
sender as a
safe sender
on
exchange so

Re: IMF and SCL values

that IMF
never
checks
for
that user ...
regardless
of having
ALL users
in an
organisation
to
have
that
particular
user as a
safe sender.

Thanks

2007,
at
times
it's
hard
to
pinpoint
exactly
why
without
looking

Re: IMF and SCL values

at
a
lot
of
other
information,
some
of
which
I
outlined
in
the
previous
post.

The
other
way
to
look
at
this
is
–
can
the
problem
be
reproduced?
Are
messages
from
a
particular
domain/host
IP
address/sender
with
particular
content
getting
the
same
treatment,
or
is
it
an
isolated
incident

Its
IMF
v2
and
that
is
our
only
server.

I
am
referring
to
the
screenshot
...
the
email
is
from
an
external
users.
3
of
his
emails

Re: IMF and SCL values

have
SCL
values,
1
doesn't.

why?

the
one
which
doesn't
have
a
SCL
rating
is
caught
as
spam

...
and
also
the
user
was
added
as
a
safe
sender.
Thus
he
should
not
be
caught
by
IMF.

Thanks

v2.
Its
not
an
internal
message.

We
have
only
one
server
and
that
has
IMF
enabled.

My
question
is
about
the
ratings
of
SCL.
For
one
message
I
have
the
ratings,
for
another
I
dont
from
the
same
user.

Thanks

Agent)
or
Exchange
Server
2003
SP2
(IMF
v2).

IMF
does
not
scan
a
message
if
it's
an
internal
message
(from
an
Exchange
recipient,
authenticated),
over
an
authenticated
SMTP
session,
if
it's
received
from
an

Hi,

I
am
trying
to
understand
why
IMF
does
not
show
be
the
Spam
Confidence
Level
(SCL)
for
the
SAME
user.

For
example,
if
you
look
at
the
user
Philip
Satim
for
the
first
3
emails
it
displays.

Re: IMF and SCL values

The
4th
email
however
it
doesn't
show.

<http://www.box.net/shared/2>

And
that
was
a
legitimate
email
and
my
user
A
had
added
Philip
Satim
as
a
safe
sender.

Thanks
