Sounds like you need to check your permissions.

Duplicate your permissions from the other FE and Check the BIN and Controls folders.

"WILDPACKET" <WILDPACKET@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx> wrote in message <news:C402DA2E-DE94-4482-9CCC-22100F2C2295@xxxxxxxxxxxxxxxxxxx>

Added a third FE and when I log on to it using OWA the page is all broken icons are out of place and says Loading

I did see some KBarticles but no luck.

Other 2 FE's are working fine. Not in the DMZ though. Adding a third one and running into this issue.

Advise Please.

Thank you
