I just installed Exchange 2007 into my domain with Exchange 2003 and I am getting the following errors but i am able to ping, nslookup, and it looks like i have a good configuration. Any ideas?

Event Type: Error

Event Source: MSExchange ADAccess

Event Category: Topology

Event ID: 2104

Date: 3/7/2008

Time: 10:44:04 AM

User: N/A

Computer:

Description:

Process MSEXCHANGEADTOPOLOGYSERVICE.EXE (PID=1308). None of the domain controllers in the domain are responding. This event can occur if the domain controllers in local or all domains become unreachable because of network problems. Use the Ping or PathPing command-line tools to test network connectivity to local domain controllers. Run the Dcdiag command line tool to test domain controller health.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.

Event Type: Error

Event Source: Userenv

Event Category: None

Event ID: 1053

Date: 3/7/2008

Time: 10:44:05 AM

User: NT AUTHORITY\SYSTEM

Computer:

Description:

Windows cannot determine the user or computer name. (The specified domain either does not exist or could not be contacted.). Group Policy processing aborted.

For more information, see Help and Support Center at

Event Type: Error

Event Source: MExchange ADAccess

Event Category: Topology

Event ID: 2120

Date: 3/7/2008

Time: 10:44:16 AM

User: N/A

Computer:

Description:

Process MSEXCHANGEADTOPOLOGYSERVICE.EXE (PID=1308). Error ERROR_TIMEOUT (0x800705b4) occurred when DNS was queried for the service location (SRV) resource record used to locate a domain controller for domain mc.tmaresources.com

The query was for the SRV record for _ldap._tcp.dc._msdcs.domain.com

.. The DNS servers used by this computer for name resolution are not responding. This computer is configured to use DNS servers with the following IP addresses:

dc2's ip

dc1's ip

.. Verify that this computer is connected to the network, that these are the correct DNS server IP addresses, and that at least one of the DNS servers is running.

For information about correcting this problem, type in the command line:

hh tcpip.chm::/sag_DNS_tr_dcLocator_messageB.htm

For more information, see Help and Support Center at

<http://go.microsoft.com/fwlink/events.asp>.

Event Type: Error

Event Source: MExchangeSA

Event Category: General

Event ID: 1005
