I'm not an Entourage expert, sorry. If you were seeing this problem with Outlook, I'd suggest that that it's related to cached mode. I recommend that you post this to one of the Entourage newsgroups.

Ed,

As a demo of what is happening he logged on to Entourage and OWA on his Mac. Then entered a appointment in Entourage calendar and it showed up in OWA and Entourage even if we exits both. Then he entered an appointment in OWA calendar, it shows up there in OWA but will not show in the Entourage Calendar even if he exits both. He can get back into OWA and the 2nd appointment will still be there.

Hope that clarifies things

John
