Hello TaylorGaffney,

I have 2 users that specifically use a local companies email service. When they attempt to forward or compose an email from our office it either takes several days for it to send or it just will simply be in nowhere land. We can send emails to any other address except this certain address. What could be cause?

Thanks in advance.

Check the headers on the received messages and find out where the delay is.

Karl

I have the heads, want me to post them?
