Looks like an issue on their end. Run their domain name in [checkdns.net](http://www.checkdns.net/quickcheckdomainf.aspx)<http://www.checkdns.net/quickcheckdomainf.aspx>. Getting 421 temporary envelope failure. Could be either greylisting or DNS issue on their end. I would contact them directly if possible. There is nothing you can do on your end other than ensure that your DNS records are good; have spf record etc.

You can see that ptd.net received it on 17  
March.

The delay is on their end.

Not much you can do, other than tell the  
recipient's to talk to their people.

Karl

Where does it show that ptd.net received it?– Hide quoted

CheckDNS.NET is testing ptd.net

CheckDNS.NET is asking root servers about authoritative NS for domain

Got DNS list for 'ptd.net' from i.gtld-servers.net

Found NS record: dns3.ptd.net[204.186.0.203], was resolved to IP address by i.gtld-servers.net

Found NS record: dns4.ptd.net[207.44.0.1], was resolved to IP address by i.gtld-servers.net

Found NS record: ns1.ptd.net[204.186.0.201], was resolved to IP address by i.gtld-servers.net

Found NS record: ns2.ptd.net[207.44.96.129], was resolved to IP address by i.gtld-servers.net

Found NS record: ns3.ptd.net[204.186.0.202], was resolved to IP address by i.gtld-servers.net

Domain has 5 DNS server(s)

CheckDNS.NET is verifying if NS are alive

DNS server dns3.ptd.net[204.186.0.203] is alive and authoritative for domain ptd.net

DNS server dns4.ptd.net[207.44.0.1] is alive and authoritative for domain ptd.net

DNS server ns1.ptd.net[204.186.0.201] is alive and authoritative for domain ptd.net

DNS server ns2.ptd.net[207.44.96.129] is alive and authoritative for domain ptd.net

DNS server ns3.ptd.net[204.186.0.202] is alive and authoritative for domain ptd.net

5 server(s) are alive

CheckDNS.NET checks if all NS have the same version

Master DNS defined by SOA (dns1.ptd.net) was not found among NS records.

All 5 your servers have the same zone version 2008030702

CheckDNS.NET verifies www servers

DNS round-robing with multiple web servers detected

Checking HTTP serverwww.ptd.net[204.186.48.101]

HTTP serverwww.ptd.net[204.186.48.101] answers on port 80

Received: HTTP/1.1 302 Found (Server: Apache/2.0.52 (Lineox))

location: tiki-index.php

Your main page redirects to another location. Several search engines will be unable to index your site.

Checking HTTP serverwww.ptd.net[204.186.48.102]

HTTP serverwww.ptd.net[204.186.48.102] answers on port 80

Re: Delivery takes several days.

CheckDNS.NET tests mail-servers

Domain ptd.net has 2 mail-servers.

Checking mail server (PRI=10) smtpin.ptd.net [207.44.97.35]

Mail server smtpin.ptd.net[207.44.97.35] answers on port 25

<<< 220 smtp13.mailnet.ptd.net ESMTP

>>> HELOwww.checkdns.net

<<< 250 smtp13.mailnet.ptd.net

>>> MAIL FROM: <dnsch...@xxxxxxxxxxxxxx>

<<< 250 ok

>>> RCPT TO: <postmas...@xxxxxxx>

<<< 250 ok

>>> QUIT

Mail server smtpin.ptd.net [207.44.97.35] accepts mail for ptd.net

Checking mail server (PRI=50) smtpin2.ptd.net [207.44.97.27]

Mail server smtpin2.ptd.net[207.44.97.27] answers on port 25

<<< 220 smtp17.mailnet.ptd.net ESMTP

>>> HELOwww.checkdns.net

<<< 250 smtp17.mailnet.ptd.net

>>> MAIL FROM: <dnsch...@xxxxxxxxxxxxxx>

<<< 250 ok

>>> RCPT TO: <postmas...@xxxxxxx>

<<< 250 ok

>>> QUIT

Mail server smtpin2.ptd.net [207.44.97.27] accepts mail for  
ptd.net

CheckDNS.NET is testing yurconic.com

CheckDNS.NET is asking root servers about authoritative NS for domain

Got DNS list for 'yurconic.com' from g.gtld-servers.net

Found NS record: dns.enter.net[216.193.128.11], was resolved to IP  
address by g.gtld-servers.net

Found NS record: ns2.enter.net[216.193.128.12], was resolved to IP  
address by g.gtld-servers.net

Domain has 2 DNS server(s)

CheckDNS.NET is verifying if NS are alive

DNS server dns.enter.net[216.193.128.11] is alive and authoritative  
for domain yurconic.com

Re: Delivery takes several days.

Re: Delivery takes several days.

DNS server ns2.enter.net[216.193.128.12] is alive and authoritative  
for domain yurconic.com  
2 server(s) are alive

CheckDNS.NET checks if all NS have the same version  
Master DNS defined by SOA (enter.net) was not found among NS  
records.  
All 2 your servers have the same zone version 14
