When I enter the domain on DNS Stuff I get this warning

WARNING: One or more of your mailservers is claiming to be a host other than what it really is (the SMTP greeting should be a 3-digit code, followed by a space or a dash, then the host name). If your mailserver sends out E-mail using this domain in its EHLO or HELO, your E-mail might get blocked by anti-spam software. This is also a technical violation of RFC821 4.3 (and RFC2821 4.3.1). Note that the hostname given in the SMTP greeting should have an A record pointing back to the same server. Note that this one test may use a cached DNS record.

Exchange 2003 SP2

Client received this error from any desktop in the office. It returns very quickly once sent. The recipients domain is not on any block list.

The error is

Your message did not reach some or all of the intended recipients.

Subject: upload link

Sent: 8/13/2008 12:01 PM

The following recipient(s) could not be reached:

xxxx@xxxxxxxxxxx on 8/13/2008 12:01 PM

You do not have permission to send to this recipient. For assistance, contact your system administrator.

<xxxxxx.com #5.7.1 smtp;552 5.7.1

<xx-xxx-xx-xx.static.oxfr.ma.charter.com[xx.xxx.xx.xx]>: Client host rejected: dynamic client name - contact support@xxxxxxxxxxx>

I can send and receive from the domain.

Thanks
