Hi

Since upgrading XP to SP 2 I can't send or forward any Mail using Outlook Web Access.

Have set IE security to low, Enabled all cookies, Put the server in the allowed site list. followed all the basic checks but no luck. It works if I select basic at login.

followed this ;

<http://www.support.microsoft.com/?kbid=883575>

Popups are fully enabled.

Turned of AV and firewall

Still not working.

I get the normail window with a "To", "From" and formating etc. but where the message should be I just get an empty box with a red cross in the top right. This doesn't make sense as it is not a picture but a text box I should be looking at.

HELP!!!!
