Hi ,

I would like to know how to disable the Sync Issues feature because it always gives me an error each time with the message "Task 'Microsoft Exchange Server' reported error (0x8004010F) : 'The operation failed. An object could not be found.'"

I'm not sure if sync issues is making the problems or not, but i really would like to remove the sync issues folder. How do i do that? from the server or from the client side?
