Hi there,

We have a setup with 2 backend E2k3 (Cluster) and 2 FrontEnd servers.

We have just upgraded all 4 to Exchange 2003 SP1, from Exchange 2000, We are running Windows 2000 SP4, with all the hotfixes.

Now Our problem is that after the upgrade to e2k3, the Preview pane in OWA, is slow to show the mail, a mail in plain text with 4 lines can take up to 30 sec to display.

The strange thing is when testing I have a new mailbox (also testet on an old mailbox with more then 10.000 mails) with 3 very short mails (3-20 lines in plain text)

When clicking on them one by one, sometimes one of them is 30 sec to display, 2 min. later the it's one of the other thats up to 20 sec to display, Anyone ever seen something like this before?

- Regards

Cokeman
