... you can use nearly every software wich is capable to download via POP3 and forward via SMTP.

a few examples are:

PULLMAIL, POP Beamer, popconnect, VPOP3, POPcon, POP2Exchange

www.msexchange.org would be a good resource to find such soft.

if you can read a little german there's also www.msexchangefaq.de.

(a list with links can be found there,

<http://www.msexchangefaq.de/internet/pop3smtp2.htm>)
