Hi,

My answer is yes to your questions about firewall, switch w/ VLANs... My built-in XP firewall was on too (I don't know why).. Do you think that could be the reason?

Sam

>> *As weird as it sounds, this is a problem that manifested itself in the last 3-4 months. I connect to Exchange 2000 through Outlook 2002 in our corporate network which is 100 Mbps network.*

>>
>> *When an email arrives in my email account it should just pop up in my Inbox. I have to switch between Inbox and Calendar or Tasks or Contacts, etc. to pull my emails. When I switch back and forth, my emails pop up in my Inbox.*

>>
>> *If I'm in a meeting, I'm away from my computer for a while. When I check my Inbox, I see nothing. I do the trick and all of a sudden, they pop up in my Inbox. It's like they get stuck in the pipe. This could be more of an Outlook issue than an Exchange one. Has anyone experience anything like this? If so, what do I need to do to fix it so my computer will behave the way it used to.*
