Ah Ok, no, not 6000 on 1 store. I think we will live with this, as it doesnt affect anything. Thx

"John Fullbright" wrote:

You only need to do this to the first store of the first storage group. Are you saying you have 6000 users on one store?

Moving 6000+ mailboxes would be quite the hassle, so if thats the best solution, then I think we can live with the invalid emails. However this link seems to be solutions geared towards older Exchange 2000 & 2003, so method 1 and 3 wouldnt work.

Thanks for your time in responding.

one of the 4 problems in  
<http://support.microsoft.com/kb/316622/en-us>.  
To  
fix it, the easiest method is #2, create a new store and move  
all the  
mailboxes to it.

Re: Exch 2007 Mailbox role sending to IMCEAEX System Attendant?

I dont follow you

Q: "why is that?"

A: because those are invalid addresses.

IMCEAEX-\_O=DOMAIN\_OU=EXCHANGE+20ADMINISTRATIVE+20GROUP+  
doesnt exist as an email address on my  
system.

Why is system attendant sending messages  
to an address that doesnt  
exist?

Is  
this a system address>

"John Fullbright" wrote:

That the IMCEA  
encapsulation occurs is  
telling you that there is no  
valid  
SMTP address for the  
recipient; exactly what the  
550 is telling you.  
Why  
is  
that?

Looking at  
our message  
tracking  
failed  
results, I see  
plenty of  
emails  
from  
our mail  
server going  
to addresses  
exchange

Re: Exch 2007 Mailbox role sending to IMCEAEX System Attendant?

cannot  
resolve and  
thus  
failing.  
I was  
curious  
what these  
emails are,  
and why the  
mailbox  
role is  
spewing  
them  
out?

For  
example,  
the from  
address is:  
MicrosoftExchange329e71ec88ae4615bbc36ab6ce41109e@xxxxxxxx

And the  
recipient  
address is:  
IMCEAEX-\_O=DOMAIN\_OU=EXCHANGE+20ADMINISTRATI

And the  
message  
tracking  
shows the  
following  
error on this  
email:  
550 5.2.0  
RESOLVER.ADR.BadPrimary;  
recipient  
primary  
SMTP  
address is  
missing  
or invalid
