Did you open port 25 on your firewall?  
Did you install an Internet Mail Connector?

You can test the IMC with the information in this article.

153119 XFOR: Telnet to Port 25 to Test SMTP Communication  
<http://support.microsoft.com/?id=153119>

If you can telnet to it from itself or other machines on the internal network, then its probably your firewall.
