Hi When I am running the DSScope scan tool I get the following error when it runs the DSConfigSun:

Error: Could not connect to the Exchange 5.5 server 'pandora'. Tools that require an Exchange 5.5 server will not run.(Pandora is my Exchange 5.5 server)

I have 2 sites configured in the 5.5 org. Does that cause a problem.

My LDAP port is configured to default.

Will appreciate any help.

Thanks
