In a new message in Outlook, she needs to put his name/address in the From field. (View | From Field).

You might ask the owner if he really wants this − there's something he can configure himself, in Outlook, in the Delegates tab in tools | options...."Send on Behalf Of" will let the assistant send mail that initially looks as though it were sent from him, but when the recipient opens it, it will say "From Joe Bloggs on behalf of My Boss".
