Sorry about possible feedback but we flattened the machine and are now installing on a clean machine.

This was done in the interest of time.

I've saved your link however for future reference.

Cheers

Not actually convinced it's Exchange at this point:
<http://support.installshield.com/kb/view.asp?articleid=q107475>

I'd format the box and start again or at least wander through the article and see if the suggestions therein help you any.
