Hello Mike,

In order to replay the transaction log files that have been generated since the last full backup you will need to perform the steps listed in the following article:

821511 How to Replay Log Files That Have Been Generated Since the Last Full
<http://kb/article.asp?id=Q821511>

Make sure that the log files are contiguous. Log replay only plays forward as long as the sequence is contiguous; when this sequence is interrupted, replay stops.

Thanks,

Caren Mallue
