Hi

This article of microsoft would help you out the link is as bellow check it out.

<http://support.microsoft.com/default.aspx?scid=kb:en-us:236811>

Windows 2000 Domain Controller

Click Start, point to Programs, point to Administrative Tools, and then click Domain Controller Security Policy.

Click Security Settings, click Local Policies, and then click User Rights Assignment.

In the Details pane, double-click Log on locally, remove the Everyone group, and then add the group or users who will have access to OWA. Close the Domain Controller Security Policy window.

Click Start, click Run, type secedit /refreshpolicy machine policy, and then click OK.
