Hello,

well, if it does not break ESM, then it is certainly correct :-)

I will look into this this evening...

Best regards,  
Henning Krause

HI Henning,

odd and even means same

DL1: Allow

DL2: Allow

DL3: Allow

DL1: Deny

DL2: Deny

DL3: Deny

but what about anonymous? If i consider anonymous as a DL, ESM breaks!  
Sample security code do the same isnt it?

So I cahnged ordering like this

Anonymous : Allow

Anonymous : Deny

User1: Allow

User1: Deny

User2: Allow

User2: Deny

Re: Sample security Code is not working!

Re: Sample security Code is not working!

DL1: Allow  
DL2: Allow  
DL3: Allow  
DL1: Deny  
DL2: Deny  
DL3: Deny  
Everyone: Allow

Is that right?

Thanks for the response

Hello,

what do you mean with odd mask and even mask?

DL must be ordered first by allow mask and then deny mask

User1: Allow  
User1: Deny  
User2: Allow  
User2: Deny  
DL1: Allow  
DL2: Allow  
DL3: Allow  
DL1: Deny  
DL2: Deny  
DL3: Deny  
Everyone: Allow

Best regards,  
Henning Krause
