Hi Jay:

I believe you are seeing a known problem in VFP 3.0 caused by the amount of RAM on the machine. See 137809 FIX: Insufficient Memory on a Computer That Has 512 MB of RAM  
<http://support.microsoft.com/default.aspx?scid=kb:EN-US:137809>

I hope this helps.

This posting is provided "AS IS" with no warranties, and confers no rights.

Sincerely,  
Microsoft FoxPro Technical Support  
Lee Mitchell

\*-- VFP9 HAS ARRIVED!! --\*

Read about all the new features of VFP9 here:  
<http://msdn.microsoft.com/vfoxpro/>

\*--Purchase VFP 9.0 here:

<http://www.microsoft.com/PRODUCTS/info/product.aspx?view=22&pcid=54787e64-5269-4500-8bf2-3f06689f4ab3&type=ovr>

Keep an eye on the product lifecycle for Visual FoxPro here:

<http://support.microsoft.com/gp/lifeselectindex>

- VFP5 Mainstream Support retired June 30th, 2003
- VFP6 Mainstream Support retired Sept. 30th, 2003

>I have an old working foxpro application (executable) that I want to  
>port over to Windows XP. its been working fine with the foxpro 3  
>runtime installed using Windows 2000 and below. Now under XP, everyone  
>gets Insufficient memory when they try to run that same app.

>I remember reading something about memory settings and perhaps something  
>that can go in the config.fpw file.
