Hi Eva,

this.parent.

That should work.. (no, not that.parent. <g>).
Sure you haven't mistyped parent? Is your
intellisense switched off?

What does messagebox(_vfp.editoroptions) show?
The string should include LQ (upper case letters,
not lq). Default is LQKT.

Try typing slowly, especially when it comes to the point.
If you slip down to SPACE the dropdown list of intellisense
won't appear. delete the point and type it again then...

Bye, Olaf.
